

# What do YOU think

What are your suggestions for keeping Emergency Departments open 24/7?

What alternative health services do you think should be in place when Emergency Departments are closed?

What do you think is the best way to address the health needs in your community?

What do you see as barriers to recruitment?

What makes a welcoming community? What can we do as a community to attract & retain health care professionals?

What is the best way to deliver / receive health care services?

What role does the community have in promoting wellness?

What worked well with this consultation process and how might we improve it?
